

## APTAMER INFORMATION

### CLIC\_0.88\_3

#### 1a. Description:

- Identifiers: CLIC\_0.88\_3
- Number of DNA nucleotides: 32 bases
- Target for selection: **Recombinant Human Chloride Intracellular Channel 1, ProspecBio, (Catalog #Pro-833-b)**

Aptamer was selected from a randomized 32-mer library against Human CLIC 1 protein. Proprietary methods were then used to select the aptamer.

#### Aptamer folding instruction before use:

Once the aptamer is in its working concentration, it needs to be heated to 85-90 °C for 2 minutes, and then cooled to room temperature before use.

#### 1b. Validation data with CLIC 1 by MST (Microscale Thermophoresis) method:

- Buffer used for validation: 1X PBS, pH = 7.4, 1 mM MgCl<sub>2</sub>
- Average K<sub>d</sub> = 169 ± 17.5 nM

**Figure 1.** Aptamer-CLIC1 binding. The thermophoresis is plotted versus the titrated CLIC1 concentration.
